

ParaFishControl

Training Course “Diagnosis of Parasitic Diseases of European Seabass and Gilthead Seabream”

General information:

Organisation	ParaFishControl (University of Udine and University of Bologna)
Venue	Udine (Italy)
Dates	13 th -14 th September 2018
Target audience	Aquaculture technicians, farmers and veterinarians
Number of participants	20

Description of the workshop:

ParaFishControl organised a dedicated training course on the diagnosis of parasitic diseases of European sea bass and gilthead sea bream. This training was co-organised by the University of Udine and the University of Bologna and was held on September 13th and 14th 2018 in Udine (Italy).

Twenty international professionals from seventeen different companies working as aquaculture technicians, farmers and veterinarians with European seabass and gilthead seabream participated in the training.

During the training, Professor Marco Galeotti and Dr. Paola Beraldo (Department of Agricultural, Food, Environmental and Animal Sciences, University of Udine), in collaboration with Professor Maria Letizia Fioravanti, Dr. Andrea Gustinelli and Dr. Monica Caffara (Department of Veterinary Medical Sciences, University of Bologna) presented the latest methods used to diagnose parasitic diseases in the most important Mediterranean cultured fish species.
